

datto | RMM

Gain complete visibility, automate operations, and secure endpoints effortlessly with enterprise-grade RMM

Turn security blind spots into real-time monitoring and control

IT teams need complete visibility and control over every endpoint to prevent breaches and stay compliant. But with fragmented tools and manual processes, critical gaps emerge—leaving devices unpatched, threats undetected, and teams overwhelmed.

Datto RMM delivers continuous visibility and automated control across every endpoint in one cloud-native platform. With intelligent automation, real-time monitoring, and 200+ integrations, IT teams close security gaps, eliminate manual work, and scale operations confidently—without adding headcount.

Benefit	How Datto RMM delivers	Key capabilities
Deliver enterprise-level protection across all endpoints	Cyberattacks target mid-sized companies that lack constant monitoring. Datto RMM eliminates security blind spots with automated patching, real-time threat detection, and comprehensive compliance reporting across every endpoint.	• Built-in ransomware detection with automated isolation • Automated patching for OS and 300+ third-party applications • 99.9% uptime • Real-time monitoring with intelligent alerts and auto-remediation
Automate workflows with an intuitive platform	Manual processes slow teams down and create inefficiencies. Datto RMM's intuitive design and 1,000+ automation components help IT teams work faster and smarter from day one.	• 1,000+ pre-built automation components for instant deployment • Real-time dashboards with intelligent alerts and auto-remediation • 24/7 human support for continuous assistance
Unify your entire IT stack in one platform	Fragmented tools waste time and limit integration. Datto RMM connects 200+ leading solutions for backup, security, documentation, and PSA—centralizing operations in one powerful platform.	• Deep integration with Autotask PSA and IT Glue • Native connections across Datto's BCDR, security, and networking products • 200+ ready integrations across leading IT solutions • Open REST API for custom integrations

"Datto RMM identified a Ransomware attack in milliseconds protecting the whole environment from a disaster."

Nathan Wright, Managing Director, NW Computing

"Datto RMM lets us segment and manage multiple facilities and spaces without losing control."

Logan Dirks, IT Operations Manager, KPS Global

"Onboarding with Datto RMM was super straightforward. All the configurations were looked at. All my questions were answered."

Michael Mollica, Chief Information Security Officer, Two River Technology

"Integration with IT Glue has been a game-changer. Technicians can now access required information without navigating multiple screens, positively impacting response times."

Paul Bush, President, OneSource Technology

Proven results

99.9%

uptime and 24/7 human support

70%

faster ticket resolution with unified integrations

88%

patch compliance reached in days, up from 60%

12M+

endpoints managed with Datto RMM globally
